## Village Council Meet

The regular meeting of the Village Council was held last Thursday evening, when the recently elected councillor, Mr. S. H. Smith was sworn in on the authorized form.

After the reading and adoption of the minutes of the last meeting, the following accounts were passed:

W. Veniard	\$12.00
W. Milligan	1.50
Empire Lbr Co.	2.30
Banner Hardware	15.25
M. L. Chapman	35.25
Wreath of Flowers	25.00

The request of W. E. Brownell for permission to make an addition to his garage be granted; also the plans and specifications for an addition to his residence presented by C. W. Rideout, be approved and his request granted.

That no public works of any nature be commenced until passed by the whole Council.

Mr. C. W. Rideout appeared before the Council as a committee of one requesting that steps be taken at an early date to lay a sidewalk to the church. The matter was discussed and referred to a committee of the whole Council for investigation.

That the funeral expenses of the late Dr. Rosenkrans, amounting to \$180 be paid; and that the Secretary write the Municipalities of Coltholme and Soundling Creek requesting assistance in the matter.

## Livestock Freight Rates Reduced

The Calgary Livestock Exchange has been informed by the railway companies that, effective October 8, the through rate on cattle from Alberta will be reduced to 70¢ per 100 pounds to St. Paul, and to 99¢ to Chicago. This reduction has been made voluntarily by the railway companies. The present rates are 88¢ and \$1.15 to St. Paul and Chicago respectively.

## Personalities

Sewing done by the day or at home. Remodeling men's and ladies coats a specialty. Prices right. Apply to Mrs. A. M. Forest, Chinook.

Mr. J. W. Salkeld and Miss Elizabeth Salkeld, of Goderich, Ont., visited Mr. and Mrs. J. R. Miller on Friday en route for Edmonton.

M. J. M. Montgomery made a business trip to Calgary last week.

Call at the Service Garage and see the Graphite Penetrating Oil. Just the thing for your car or machine.

Mr. H. Fergusson, Postoffice Inspector, of Saskatoon, was in Chinook on Tuesday.

A number of the local sports spent the week-end at Kilpatrick Lake geese hunting, returning Monday with a bag of twenty five geese.

Mrs. J. R. Mitchell left Wednesday for the Mayo Hospital, Rochester, Minn., where she will undergo an operation.

Mrs. A. Barr left Tuesday morning for Veteran, where she has rented a restaurant.

Read the two announcements of closing-out sales of J. R. Miller and R. S. Woodruff. Both these sales commence next Saturday, October 1st.

Mr. and Mrs. Jos. Ruttle, of Tessier, Sask., was the guest of Mr. and Mrs. M. J. Hewitt this week.

Mr. A. W. McLean and family moved into town last week and are residing on Railway Avenue.

The Cooley Bros., threshing outfit finished threshing Wednesday after a twenty days run.

Mr. R. S. Woodruff and Robt Smith motored to Youngstown Monday evening.

Mr. Harry Meade shipped a car of choice steers to Calgary on Tuesday.

"The Store that Saves You Money"

## The West and Redistribution

It is altogether probable that, even before the present issue of this paper reaches its readers, the Dominion Parliament will be dissolved and writs issued for a new Parliament whose legal span of life will run until 1927 unless, because of some exceptional circumstance, it is deemed advisable to consult the people before that year.

In compliance with the terms of the constitution of Canada a census of the population was taken in the month of June last. It is also provided by the constitution that upon the completion of such census the representation of the several Provinces in the House of Commons shall be readjusted in such manner as to give to each Province equality of representation based on population such readjusted representation to become effective upon the termination of the then existing Parliament.

It is admitted by all people in Canada, from Premier Meighen down, that that portion of Canada west of the Great Lakes will be shown to be entitled to a larger representation than it now enjoys, and the fact is equally well recognized that Canada east of the Great Lakes will not be entitled to quite as many representatives as it now has.

Nevertheless, although it would require only a few months more to compile and tabulate the 1921 figures of population and thus make possible an early and fair readjustment of the representation of the Provinces in the House of Commons, Parliament is hastily dissolved, although a new or sudden issue has arisen, and a new Parliament issued which will result in Canada for the next five years being governed by a House of Commons which is not truly representative of the country.

The action taken may be constitutional within the strict meaning of the law, but it seems a violation of the spirit of the constitution. Yet it is not the first time this has happened in Canada. In fact ever since the population of the West began to increase so rapidly, while the population of Ontario and the Maritime Provinces failed to keep pace with Quebec's increase in population, there has been a tendency at Ottawa to precipitate general elections in the year of the census taking right on the eve of redistribution but before making it effective.

Let us take a historical glance back over the past thirty years, and the last three census enumerations. In 1891 the House of Commons consisted of 215 members representing the Provinces as follows: Ontario 92, Quebec 65, Nova Scotia 21, New Brunswick 16, Prince Edward Island 6, Manitoba 5, British Columbia 6, North West Territories 4. This was a census year but instead of a redistribution bill being passed before going to the country, Parliament was dissolved, the issue being Reciprocity with the United States. It was not until five years later that the country secured the benefits of the readjustment which was really due in 1891.

The next census came in 1901, but a general election had been held the preceding year, but as the result of the previously delayed redistribution, Ontario was entitled to only 86 members instead of 92, the three Maritime Provinces lost 5, while Manitoba doubled its quota from 5 to 10, the North West Territories from 4 to 11, and British Columbia added one. In 1902 the new Provinces of Alberta and Saskatchewan were created, Saskatchewan being given 10 members and Alberta 7. The additional representation became effective in 1908.

While the figures of the census of 1911 were being tabulated, Reciprocity with the United States again became a live issue and an Agreement signed with the United States came before Parliament for ratification. Strong opposition developed in Eastern Canada and the Opposition obstructed and blocked the passage of the bill. The Government thereupon appealed to the country, and once again the West was denied of its rightful representation on a question in which it was vitally interested, while the East was allowed a representation to which it was not justly entitled.

War broke out in 1914 and by agreement the life of the Parliament elected in 1911 was extended and it was not until 1917, therefore, that the people secured the benefits of the representation to which they were really entitled in 1911. That long delayed readjustment further reduced Ontario's representation to 82, a loss of 10 members in two decades; Nova Scotia dropped to 16, a loss of 5 in the same period; New Brunswick fell by 11, a loss of 5; P.E.I. to 3, or only one-half what it had in 1891. On the other hand Manitoba increased to 15, or three times its representation in 1891; Saskatchewan got 16 and Alberta 12, as compared with 4 for the N.W.T. in 1891; British Columbia was increased to 13 as compared with 6 in 1891; and the Yukon was given one.

In other words, although the membership of the House of Commons only increased from 215 in 1891 to 234 on the strength of the census of 1911, the representation west of the Great Lakes rose from 15 to 57, while the representation east of the Great Lakes fell from 200 to 177.

It is generally agreed, both East and West, that the same evolution in the political power of the country is taking place; that is, that the representation of the West will be increased and that of the East decreased when the final figures for 1921 are tabulated. It means that for one-half of the whole period during which the readjusted representation should be in effect the West will be under-represented.

### Scottish Castle Sold

Has Secret Chamber and Walls Ten Feet Thick.

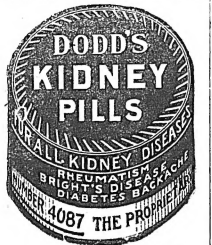

Viscount Cowdray has bought the estate of Cuslo Fraser, Donisde, Aberdeenshire, for £48,000. Castle Fraser is reputed to be one of the finest specimens of the Flemish style of architecture in Scotland.

The castle has a secret chamber in which the master of the house could overhear the conversation of his guests in the dining hall. This is supposed to have suggested to Sir Walter Scott a similar contrivance in "The Fortunes of Nigel." Walls throughout the building, which stands upon arches, are from 6 feet to 16 feet thick.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

### Many Uses For Paper.

In the art of making and using paper we are not in line with the Chinese and other Asiatics, who not only make the finest paper in the world, but apply it to all sorts of uses, making window panes, umbrellas, fans, sandals, and even clocks and garments of it.

### Family Of Fifteen Coming To Canada

Father Is Minister But May Farm In Saskatchewan.

A family of fifteen, consisting of father, mother and thirteen children, stepped on the Canadian Pacific liner Minnedosa at Liverpool bound for Canada. They were as cheery a party as any on the boat and all looked forward with hopeful expectation to the new life which the voyage was opening to them.

Of the children the eldest is 13 years old, and the youngest two. There are eight boys and five girls, including two pairs of twins. The head of the family is the Rev. Rufus John Kirkland, a Primitive Methodist minister, of Danbury, Oxfordshire, who is coming to the little prairie town of Mazenod, Saskatchewan, to take up the pastorate of a church there, and possibly a farm.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine oil remedy which has made thousands of firm friends during the past fifty years.

A Disappearing Island. One of the most famous of disappearing islands is Expedition Island, situated off the northwest corner of Australia, and which was visited as lately as 1892. Today it has disappeared, and is now fifty feet below water. The island was 13 miles long and famous for its beauty.

"I see you have a new hired man, Ezra," said Eben Potter. "How is he doing?" "Resting considerable easier than the other one did, thank ye!" replied the disgruntled farmer.

### Honesty Was Not Lavishly Rewarded

Paris Chauffeur Given One Dollar For Returning \$10,000.

Among the 55,000 articles lost in Paris and returned to the police department in 1919 were 20,000 umbrellas, according to figures just published. Eighty per cent. of the articles, lost in taxicabs are reclaimed, one chauffeur recently bringing a glove of which three fingers were missing. Honesty is not always lavishly rewarded, as may be seen from the case of a chauffeur who sacrificed a morning's work to trace an old woman who had left \$10,000 in notes in his cab and was rewarded with a dollar.

### BARELY LIVED THROUGH IT

A terrible experience had Edw. J. O'Connor, of Saint Ste. Marie, from boyhood he writes: "I have been a constant sufferer from Asthma, Catarrh. My nose and throat was often stopped up, and I had disagreeable droppings from my throat. When an attack of coughing came on, I seemed as if I would barely live through it. I would gasp for breath. Catarrhus made me feel well. The soothing healing action was exactly suited to my case." To those who suffer from Asthma, Catarrh, Throat Irritation and Bronchitis, Catarrhus is highly recommended. Two months treatment, one dollar, smaller size 50c and 50c at all dealers or The Catarrhus Co., Montreal.

### Steel Shipped By Airplane

Was Required in a Hurry For London Depot.

Two exets. of steel were conveyed from Manchester to London by aeroplane for use in connection with the completion of the steel work construction of the new depot of the London General Omnibus Company at Chiswick, W. The aeroplane, an Avro, was chartered by Lambourne and Co., Ltd., Victoria Steel Works, Openshaw, Manchester, who are responsible for the work, the steel being urgently required for certain vital parts of the building. The machine left Manchester at 9 a.m., reached Croydon, London, at noon and he about four o'clock the steel was in position at the new depot.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and for one to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops on a piece of lint or cotton and placed in the ear will do much in relieving pain.

Explaining It. Fountain pens figure among the utensils confiscated in America for containing illicit whisky. No wonder some of these Americans are such spirited writers.—From London Opinion.

### DELICATE GIRLS NEED NEW BLOOD

Rich, Red Blood Means Health and Strength.

The anaemia of young girls may be inherited, or it may be caused by bad air, unsuitable food, hasty and irregular eating, insufficient exercise and not enough rest and sleep.

It comes on gradually, beginning with languor, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the paleness of the face, headaches, dizziness following a stooping position, frequent backaches and breathlessness. In a majority of cases constipation is present. There may be no great loss of flesh, but usually the complexion takes on a greenish-yellow pallor.

Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drugs, are just the tonic needed to remedy this wretched state of health. Though it is not noticeable, improvement begins with the first dose. As the blood is made rich the pallor leaves the face, strength and activity gradually return and the danger of relapse is very slight.

If any symptom of anaemia appears, the prudent suggestion is to get Dr. Williams' Pink Pills should be given at once, and the sooner they are taken the more speedily will their action improve the blood. You can get these pills through any dealer in medicine, or by mail at 50 cents per box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Barcelona Has 717,000 People. The recent census shows that the population of Barcelona is now 717,000, an increase of nearly 120,000 over 1910.

MURINE Night and Morning. Have Clean Eyes. Use Eye Drops. Smart or Dumb, If Sore, Irritated, Inflamed or Itchy. Get Murine. Murine often, Soothes, Refreshes, Safes for Infant or Adult. At All Druggists and Opticians. Write for Free Eye Book. Murine Eye Drops.

W. N. U. 1387

### Make The Most Of Apples

BY LORETTO C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

With the first days of autumn, the market sees a glorious array of healthful apples. Apples are to the fruit world what potatoes are among vegetables. Unlike most fruits, we do not readily tire of them. It behooves the housewife, therefore, to buy apples in quantity—such quantity as the conventional six or eight bushels.

Pick out the best looking apples from among those you purchase, wash them thoroughly with a brush and warm water, dry and polish with soft paper. Pile these in your prettiest fruit dish. The kiddie will often pass by the candy box to pick up and bite into an apple.

While nearly always apples in the raw are easily digested, it sometimes happens that in order to be more easy of digestion, they need to be cooked. There are innumerable recipes for cooking apples in various ways, but every housewife should be familiar with at least three or four easy methods of preparation without reference to her cook book.

For baking, select the green or cooking apple. It is perfectly possible to make the pretty red apple so common in many sections, but connoisseurs long ago decided upon the all-round superiority of the green apple. Since apples are of the acid fruits, cooking them in either tin or iron vessels must be avoided. An earthen baking dish, an aluminum pot or pan, or the familiar agate or granite utensil must be used.

Before deciding as to the number of apples you will bake, remember that a leftover baked apple that has been properly cared for is quite as good as the second or third day after baking. It may be wise in order to economize in oven heat to bake more than you expect to use immediately.

Scrub the apple, remove the core and a strip of skin an inch in width from the stem end of the apple. This will help to prevent the burning of the skin. Place the apple on the baking dish, fill each cavity with brown sugar and add either a few grains of ground cinnamon or a few drops of lemon juice to each apple. A dot of butter may be put here and there on the apple.

Pour a little water, preferably hot, into the bottom of the baking dish and set dish in a moderate oven. Open the oven every ten minutes and with a spoon dip the syrup over the apple to prevent burning. Serve cold either with the syrup formed in the dish or with cream, plain or whipped.

From the loss perfect apples one may prepare steamed apples. Cut the apple in half, remove the skin and stem and from each half of the apple cut about four sections. Make a syrup by boiling together for five minutes a cup of water and one-fourth of a cup of sugar.

Into this put the apple and stew slowly until tender. Care must be taken not to overcook the apples and cause them to break. A bit of stick cinnamon or a couple of cloves or some lemon or orange rind may be cooked with the apple to vary the flavor.

Deep dish apple pie should not be overlooked. This is made with an upper crust only. The best crust will soak the fruit, just as if placed on the bottom, and unless one has a particularly good digestion it may cause trouble. A glass baking dish is ideal for this type of pie. The shops are showing delightful little individual glass pie dishes which are highly desirable for serving one-crust pies.

A Good Sign. Inquiry is being made that a wave of something cannot be discovered that would add to the sum of happiness, as a relief from the crime waves and suicide waves with which we are constantly regaled. It is nevertheless a good sign that a wave of happiness is still not new. Happiness is a good deal commoner, and hence more commonplace than the suicides and crime waves which are so common. It is willing to admit.—From the Portland Oregonian.

Good spuds to grow. Early Ohio, Irish Cobbler, Woe McGregor, Duke of York. As these will mature before we get killing frosts.

The foot sooths his neighbor's hens from his backyard, but the wise man find up a snug place for them to lay in.

A man puts a woman's head on the silver dollar, and now women are trying to get their hands on it.

### A Pertinent Question

Why Did Kaiser Run If Troops Were Never Vanquished?

With his old-time grandiloquence the former German Kaiser sent a message to the Junker meeting held by his son and Ludendorff in Berlin recently, in which he exclaimed: "With proud and warm gratitude I think today of my brave comrades, never vanquished in the field." But if they were never vanquished in the field why is it that the present partner of "Me and God" so unceremoniously skeddaddled from the field and scurried into hiding in Holland, whence he has never dared poke his head above the border since?—Louisville Courier-Journal.

### Killed By Blood Poison

Used an old razor for paring his nose. Foolish because 25c buys a bottle of Putnam's Painless Corn Extractor which for fifty years has been removing corns and warts without pain. No failure if you use Putnam's. Refuse a substitute, 25c everywhere.

### Rooms With Baths Are Scarce.

In London and Paris there are several hotels which have rooms with private baths, but there are very few in the average European hotel. It is always an extra when used with cold water. Hot water is difficult to obtain in winter, and in some hotels, where it is worked by a slot machine attached to a gas geyser, the guest has to feed it with 20 cents for every quart of water.

### Spore the children from suffering from worms.

Use Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The foisting acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

### Record Among Canadian Indians

Six Generations Have Been Discovered At Nelson House.

Six generations of one family, whose aggregate ages amount to 242 years, have been discovered at Nelson House. They belong to the Cree tribe of Indians and were photographed at the payment of terms in July. It is believed that this establishes a record, at least among the Indians of Canada.

The names, ages and relationship of the family follow:

Sarah Donkey, age 112; Carolyn Spence, age 90, daughter; John Donkey, age 70, grandson; Ida Spence, age 46, great-granddaughter; Sarah Donkey, age 25, great-granddaughter; Jennina Donkey, age 2, great-great-granddaughter.

Sarah Donkey, the first, was born at York Factory of full blooded Cree parents. She retains possession of all her faculties excepting her eyesight, which is failing. To attend to the family she trained in a canoe for 150 miles and lived in a teepee for three weeks, while the treaty negotiations were on.

Hutchinson, Kas., claims to be the largest exclusive hard wheat market in the world. Nearly 100,000,000 bushels of hard wheat will be marketed through the Hutchinson elevators this year.

In China, 12 1/2 miles from the village of Lion Chok, there is a mountain of alum, which, in addition to being a natural curiosity, is a source of wealth to the inhabitants of the country.

### Industrial Ontario

Has More Than 50 Per Cent. of Dominion's Manufacturing Plants.

Ontario is the richest province of Canada. Of the Dominion's wealth, estimated at 2,801,000,000 for the year just past, Ontario's share was \$1,267,000,000. Consistent with the remainder of the Dominion, agriculture asserts its superiority over other lines of activity and maintains the premier place in provincial assets. Ontario is, however, the first industrial province of Canada, considerably more than fifty per cent. of the product of the Dominion's manufacturing plants being attributable to this province.

### Minard's Liniment Lumberman's Friend.

W. E. Lord, 23 years old, captain of a steamship of the Baltimore Steamship Company, is one of the youngest skippers on the Atlantic coast. Captain Lord is a native of Springfield, Mass., and first went to sea when he was 16 years old.

### Dyed Her Draperies

Also a Faded Skirt

"Diamond Dye" adds years of wear to worn, faded skirts, waists, coats, stockings, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, lustrous colors into her worn garments or draperies even if she has never dyed before. My Diamond Dye has changed my old material into color as right, because Diamond Dye is guaranteed to stretch, fade, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods.

### Snub From Argentine Government.

A Reuter's message from Buenos Aires states that the Argentine Government has declined to receive Laurence Ginnell officially as the representative of the "Irish Republican Government." The foreign Minister, however, received him at his residence in a private capacity.

### Ask for Minard's and take no other

An eminent scientist has estimated that the average man's eyelids open and shut four million times during the year.

Others loaf. We merely take a rest.

### LETTER FROM MRS. WAKELIN

Tells Remarkable Story of Sickness and Recovery.

"Toronto, Ont.—"I suffered greatly from weakness, seemed to be tired all the time, and had no ambition to do anything or go any place. My nerves were in bad shape, I could not sleep at night, and then came a breakdown. I read of Lydia E. Pinkham's Vegetable Compound in the newspapers and several of my friends advised me to use it, and I surely put new life into me. Now I am quite able to do all my own work, and I would strongly advise every suffering woman to give Lydia E. Pinkham's Vegetable Compound a trial."—Mrs. CHARLES WAKELIN, 272 Christie St., Toronto, Ont.

The makers of Lydia E. Pinkham's Vegetable Compound have thousands of such letters as that above—they tell the truth, else they could not have been obtained for love or money. This medicine is no stranger—it has stood the test for more than forty years.

If there are any complications you do not understand write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass.

## Terrific Explosion Wrecks Chemical Plant At Oppau, Germany

Mayence.—A great explosion at the chemical products plant of the Badische Anilin- und Fabrik Company at Oppau, on the Rhine, wrecked the town and spread death and destruction on every hand. The number killed is variously estimated at from 1,000 to 1,500, and the injured close to two thousand. One report says that there were 3,000 men on the spot at the moment of the explosion and it is believed that about half of these were killed.

The town of Oppau is a scene of utter desolation, more than a third of the houses having been completely demolished, while the roofs of the others were swept off as if by a whirlwind. Here also many were killed or injured.

The explosion is attributed by some to excess pressure in gasoline meters, the whole of this part of the works being literally pulverized. Where the gasometers stood is now a funnel shaped hole 130 yards wide and 45 yards deep, while twisted girders and debris of every description lie scattered about. For a distance of several hundred yards, not a wall is left standing.

The directorate of the company is quoted as saying that the explosion occurred in a storehouse containing four thousand tons of nitrous sulphates, which had previously been examined and was believed to be free from danger of explosion. "All the workmen's dwellings in the city were razed to the ground. At Mannheim, on the opposite side of the river, 35 persons were seriously injured and two hundred or more suffered minor injuries. Ludwigschafen reports say that three women's trains were hurled under the wreckage, and many children on their way to school in that town were injured."

Mayence.—A late statement issued by the management of the Oppau factory says that the explosion occurred in a reservoir containing 200 tons of ammonium sulphate. It adds that all necessary precautions had been taken during the process of manufacture and storing the product, so that an explosion appeared impossible.

## Russian Scouts Ask For Famine Aid

Send Appeal For Starving Children to Canadian Scouts

Chita.—The Russian boy scouts are sending a message to the Canadian scouts appealing to them to organize famine aid. Many children have been sent here from the Volga country this month. They will be apportioned among private families as the Chita Government is not able to provide for them owing to its lack of funds.

The children coming from the interior of Russia brought a little food with them. An analysis of their bread shows that it was made of a mixture of sorrel, grass and a trace of bran.

According to reports received here in the ten governments in the valley of the Volga there are 90,000,000 persons starving.

## Food Is Cheaper In England

Shopkeepers Also lowering Prices of Dry Goods.

London.—While the general tendency of retail prices in England is downward, complaint has been made that the licensed victuallers are now charging more for beer and whiskey although the cost of brewing materials has decreased. Shopkeepers are generally lowering their prices of food-stuffs and dry goods in consequence of the announced drop in current wholesale quotations.

In many cases this means a sacrifice of profit on the retailers' part, but it is pointed out that many of the retailers who are most reluctant now were among the first to sack up their existing stocks when prices were rising.

### Liner Teutonic Sailed.

London.—The Teutonic, the big White Star liner, which for upwards of 30 years was engaged on Atlantic passenger service, has been sold to a Dutch firm and is being taken to Rotterdam to be broken up.

### Warns Irish Taxpayers.

Delfest.—Irish Republican authorities have warned the people of some of the districts of Ireland to refuse to pay income taxes to British collectors until the Dail Eireann has reached a decision on that subject.

## WESTERN EDITORS

W. G. Fitchell, Postage in Prairie, Publisher of Okaville Standard and Langruth Herald.

## Veterans May Organize Legion

Organization Would Mean a Unity of All Members.

Toronto.—The Canadian Legion of Veterans which is designed to form a medium through which all Canadian ex-service men and women may unite as members of one veteran's organization becomes a definite unity as a result of action taken at a recent meeting of the provisional committee, voted to proceed with the organization of the legion, they at the same time stipulated that such organization should constitute only a holding body "until such time as amalgamation becomes an accepted fact."

## Fire Destroys Lumber Stocks

Loss of Ontario Company Will Be Heavy.

Parry Sound, Ont.—Fire destroyed the mill and lumber stocks of the Conger Lumber Company, as well as a large number of boats, canoes and bathhouses, along the waterfront. For a time the town itself was threatened with destruction, but the wind that blew from the southeast aided the fire fighters.

Besides the mill and machinery, the loss includes six million feet of lumber, four million pieces of lath, piles, slabs or other mill products, as well as barns, stables, dwellings, tramway and railway spur lines. The extent of the loss, which has not yet been estimated, is partly covered by insurance. About eighty men will be thrown out of employment.

### Lawlessness In India Continues.

London.—A Reuters dispatch from Madras, India, says raiding and wholesale looting is still prevalent in parts of the Malabar district and bodies of rebels are terrorizing the countryside.

## French Considering Disarmament Question

Paris.—The tentative agenda of the approaching conference at Washington on armaments and the Far Eastern matters has been received at the French Foreign Office. It is understood to meet with the French Government's approval, except the clause containing the limitation of land armaments.

Premier Briand personally is studying this clause and has asked the advice of Marshals Foch and Fayolle before making suggestions regarding modifications.

## Great White Chief Will Respect Treaty

New York.—Chief Wash-Ka-Leh, of the Cayuga Indians, has returned on the Olympic from London after a pilgrimage to the foot of the throne in the interests of his tribe.

The chief laid before King George V, the treaty made with the Indians in the reign of King George III, and the wampum belts that confirmed it. He declares that he won his case before the great white chief and announced the treaty will be respected.

## Canadian Loan To China

Agreement Recently Signed Has Raised Important Issues.

London.—The Times correspondent at Peking says that important issues have been raised in the agreement recently signed in that city by which a Canadian banking syndicate will lend the Republic of China \$3,000,000 gold against one-year bonds, secured on various enterprises. It is noted that the discount and interest give a return to the Canadian investors of a rate exceeding 20 per cent. per annum.

The correspondent says that the transaction seems to be in order except that the consortium of the powers formed to regulate the question of a loan to China has not been constituted and that the loan is a direct negotiation of the British Government's policy in China.

It is pointed out, however, that the Canadian Government is not a party to the consortium agreement between Great Britain, United States, France and Japan, and may feel under no obligation to observe its terms. Nevertheless, foreign parties to the consortium will naturally take the view, says the correspondent, that if the Canadian loan goes through, the British Government will be subscribing to one policy with the right and totally different policy with the left. The consortium agreement must end if all parties to it do likewise.

## Disorders In Vienna

Crowd Incensed At Profiteering In Foreign Exchange Values.

Vienna.—Serious disorders occurred in this city following the closing of the bourse. Many rushes were made upon the entrances to the building, but these were checked by the police. The crowds then wrecked the shops of several money changers in the vicinity, while a few men suspected of speculating in foreign exchange were dragged from their automobiles and beaten.

Impromptu mass meetings were addressed by speakers who declared the bourse would be closed permanently if profiteering in foreign exchange values did not cease.

## German Plan For Raising Funds

Reparations Commission Approve Idea of Credit Organization.

Berlin.—The German Reparations Commission which is dealing with the problem of raising funds for future German indemnity payments, has approved a plan looking to the creation of a collective credit organization embracing all industries, banks and realty owners on the principle of limited liabilities. The plans contemplate the mortgage to the State by each member of a fixed proportion of its holdings in return for which certain abatements of taxation would be granted.

## Declare Unemployment Is Now Great Britain's Big National Problem

### Plan To Reclaim Lands In B. C.

Would Bring About Thirty Thousand Acres Under Cultivation.

Recently there appeared in the press a despatch from Victoria, B.C., stating that at a joint conference of the drainage officials of the State of Idaho and the Province of British Columbia, an agreement had been entered into which would assure fishery investigation work to determine the feasibility or otherwise of draining 60,000 acres of land in the Kootenay River Valley, approximately half of which area lies in Idaho and the other half in British Columbia.

Looking solely at the 20,000 acres on the Canadian side of the boundary line, to the average prairie dweller the bringing of this area—less than 50 sections—under cultivation is a matter of hardly more than passing moment; in many parts of the west the swinging of such a project nowadays would get scant attention except for local publicity purposes.

In British Columbia, however, where 20,000-acre tracts of continuous agricultural land of outstanding fertility is very much the exception, rather than the rule, the probability of ultimately bringing such an area under production is attracting almost providential attention; in some measure due to the fact that the only reclaimed lands are located in the very heart of a territory that rather badly needs agricultural products of the sorts this overworked country can produce in both quantity and quality.

The cause of this annual overflow of the area is simply a matter of too large an intake of water and too small an outlet for the spring floods. The Kootenay River, with its tributaries, draining the whole of the western slopes of the Rocky Mountains in B.C. and the Selkirk ranges, after a bold sweep southward running into the United States as far as Bonners Ferry, Idaho, from that point turns directly north again to B.C. and Kootenay Lake. At the same time the Snake River and others run into the lake at the other end and the combined volume of water passes out toward the centre of the lake by a passage called the West Arm, like the downward stroke of a gigantic T, past Nelson and Bonington Falls to join the Columbia River.

The reclamation has solely to do with the enlarging of the lake's outlet. In 1913 a preliminary survey was made by Engineer Muering, who in his findings reported favorably on the project but asked for a more thorough examination of the whole territory before making a final decision. With the outbreak of the war the next year the scheme was, for the time being, abandoned. American engineers have also spent two seasons on the work, and their report made public two years ago, was strongly in favor of the work being proceeded with, the estimated cost being a little over \$2,000,000.

The land is in one of the older settled parts of B.C. interior, already supplied with railway communication by the Crow's Nest line, has good highways, educational facilities and every modern convenience, so that the province would be at no expense in providing them. The bench lands surrounding this to-be-reclaimed area is one of the finest fruit areas in all B.C. The climate is ideal.

The entire area in B.C. is government-owned land, and the Board of Trade at Creston which for years has been urging its reclamation expects the provincial lands department—if the lands are drained—to adopt a policy of selling the tract in not larger than 160-acre farms to bona fide farmers or settlers, at a price that will just nicely suffice to meet the full cost of draining the area. As to the cost of the work it has been agreed that the U.S. and British Columbia interests will pay this pro rata on the basis of acres reclaimed.

### Will Not Visit Canada.

London.—There is no question as to the Prince of Wales visiting Canada on his return journey from his tour of India as he will follow the same route homeward as on his outward voyage, namely, via the Suez Canal.

### Canadian Navy In B.C.

St. John, N.B.—The cruisers Aurora, Patriot and Patricia, and submarines CH-15 and CH-16, members of His Majesty's Canadian Navy, arrived in St. John from Halifax and docked at Sand Point, West St. John.

London.—A manifesto just issued by the Labor party declares that the unemployment situation is a national problem and requires a national policy to deal with it.

The Government's scheme of placing the main portion of the burden on local authorities, says the manifesto, is unjust, inadequate and indefensible, and must be abandoned in favor of much more generous assistance. It work is not provided for the unemployed, then provision for their maintenance must be made through adequate unemployment insurance benefits.

The suggestion is also made that the Government should place orders for staple commodities for which there is a demand, at prices to be agreed upon after examination of the goods. It contends also that employers cannot expect to receive normal profits and that prices should cover the bare costs of production. The manifesto further proposes that the Government should export wool, textiles and agricultural machinery to needy European countries on credit.

"Cooperation between the Government and local authorities, manufacturers, traders, bankers and organized labor is essential," said the Prime Minister, "if we are to get to grips with the problem."

## Delighted With Canadian Tour

Sir John Simon Enthusiastic Over People of Dominion.

London.—Sir John Simon on returning to England after his visit to Canada expressed himself to the Canadian Press representative as full of enthusiasm for the Dominion of Canada and her people. His stay across the Atlantic had been delightful.

Sir John begged to be excused, however, when asked as to his views concerning the Canadian attitude toward the question of legal appeals to the Privy Council in London. He said he did not feel disposed to deal with this subject. It will be remembered that on his return from Canada last year, Lord Cave of the Court of Appeal, gave an extensive account of his impressions as well as the matter of Dominion appeals to the Privy Council and much likely discussion was thereby provoked.

## Cannot Get Rid Of Extremists

Soviet Will Not Receive Undesirable Russians From U.S.

Washington.—More than 100 Russian anarchists are at liberty in the United States under bonds which are covered by \$600,000 in Liberty bonds deposited with the Secretary of Labor. On account of the refusal of the Russian Soviet Government to accept them, it has been impossible to deport them, efforts of the U.S. Government to induce the Soviet Government to open its borders to receive these extremists as well as to receive about 100 insane and other undesirable Russians, so far have been futile.

### Reach Salisbury Beach.

Salisbury Beach, Mass.—J. H. Engle, of Halifax, N.S., and Arthur Strassus, of St. John, N.B., in their 16-foot open boat put in here after being buffeted in a heavy sea off shore on their voyage from Halifax to Vancouver via the Panama Canal. They entered their trip July 25 last.

### Hostilities Broken Out.

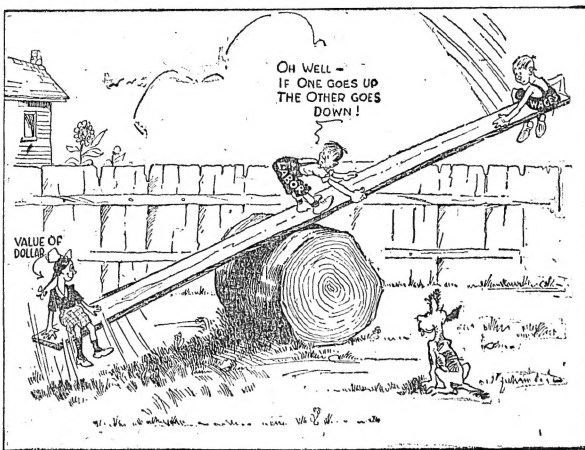

Geneva.—Announcement that hostilities between Yugoslavia and Albania have broken out has startled the assembly of the League of Nations in session here, and there is a disposition on the part of many of the more prominent leaders to bring the situation before the assembly at the earliest possible moment.

### Republic In Hungary Denied.

Budapest.—Austrian reports that Stephen Frederick has proclaimed a republic in West Hungary and that the Hungarian Government has ordered the mobilization of troops are denied by the Hungarian agency.

Toronto Man Catches Largest Trout.—Port Arthur, Ont.—W. G. H. Brown, Dominion Bank Inspector, Toronto, is winner of the Canadian National trophy for the largest brook trout caught in the Nipigon River this season. The fish weighed seven pounds.

Spend your money at home, thereby helping your own town and local merchants.

## What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product.

So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship.

It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clean-cut, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with

### A Modern St. Nicholas

It was a very dark night, and one of the members of the family having occasion to open the front door, found the door handle very hard to turn. When the door was opened the mystery was solved for a modern St. Nicholas had hung on the door knob a fine brace of ducks!

We are pleased to note that the Village Council are busy spending that \$2,000 on the streets and sidewalks.

By the way, speaking about sidewalks, reminds us that we heard that the Village Fathers were gaily entertained last meeting night. Whether those of us who were unable to be present were fortunate or unfortunate is hard to say. We don't know whether we are mind readers or not, but we had a premonition that something was going to happen. There is a proverb that says: "Coming events cast their shadows before them." While walking down the street last Thursday evening we overheard a heated debate on "not laying down the law" but on "laying down sidewalks"! This, to our mind was the shadow of a coming event.—And were we not right?

There appears to be a marked interest taken by the ratepayer of Chinook in the doings of the Village Council, especially in regard to the laying down of sidewalks. This interest is quite justified, not only in this instance, but in every project which is for the improvement of the town. We feel sure that any suggestions which are put before the Council will receive their due consideration. However, councillors like everyone else, are only human, and are liable to make mistakes. Therefore, when we criticize let us be charitable in our criticism and make sure that our criticism is of a constructive nature and not of a destructive nature. Anybody can be a destructive critic, but it is not every body that is a constructive critic.

Now for the Sidewalks!

Remember the Chinook and Dis-School Fair to-morrow (Friday, Sept. 30).

Contributions of good Alberta beef in behalf of needy settlers next winter may be asked of farmers and stockmen who are disposed to help out their less fortunate fellow farmers in the southern part of Alberta. The recent offer from a number of Settler people of two car loads of fat cattle has suggested to the government the possibility of others being willing to follow suit and Premier Greenfield says that an opportunity may shortly be given through a general invitation to Alberta farmers to take a hand in such a scheme if they are so disposed.

The beef so contributed will be slaughtered under government control, put in cold storage and given out to those in need during the winter. It will be understood that any meat offered in this manner will be used for free distribution to deserving cases only.

## RAILROAD OFFICIALS ON TOUR.

A. D. MacTier.

E. W. Beatty, R.C.,  
President C.P.R.

D. C. Coleman.

Sir Augustus Nanton.

Sir Herbert Holt.

Senator F. L. Belque.

Mr. E. W. Beatty, R.C., President of the Canadian Pacific Railway, is now on a trip of inspection over the Western Lines, accompanied by Sir Herbert Holt, and Senator F. L. Belque, of Montreal. Directors, A. D. MacTier, Vice-President of Eastern Lines, with the party as far as Fort William. D. C. Coleman, Vice-President of Western Lines, travels with the train in the West. Sir Augustus Nanton, Winnipeg, another director, with his brother, General Nanton who is on a visit to Canada, joined the party at Winnipeg.

The party travels as far West as Victoria. On the trip they are being entertained at various large centres. A glimpse of their programme shows that it is a busy one: First stop at Revelstoke, B.C., where the officers of the C.P.R. at Winnipeg, and to a dinner at Governor House, Winnipeg, on the same day; then entertained to luncheon by the Moose Jaw Board of Trade. The train leaves the main line at Medicine Hat for Lethbridge and the Crow's Nest. Sullivan Mine is visited, after which the train is conveyed by barge over Kootenay Lake to Nelson, Penitence in the Okanagan Valley is reached over the lines of the Kettle Valley Railway, and after a stay there of three hours the train proceeds to Vancouver. Leaving for Victoria by steamer the C.P.R. Directors attend the opening of the new Hudson's Bay Store on Monday Sept. 19th. Next day they are entertained to luncheon by the officers of the C.P.R. at Vancouver, after which they return East over the mountains stopping at Revelstoke, Wapta Lake, Lake Louise and Banff. At Calgary on Saturday, the 24th Sept., the officers of the Company had a luncheon in their honor. The itinerary then proceeds by way of Edmonton and Saskatoon, where the Canadian Club entertains the party at a luncheon on Monday, the 26th Sept.

Edward Wentworth Beatty, President of the Canadian Pacific Railway, was born at Thorold, Ontario, in 1876. He moved to Toronto with his parents when he was ten years of age. He studied in Toronto at the Model School, Upper Canada College, Harbord Street Collegiate School, the University of Toronto, and the University of London. He came to study law with the firm of McCarthy at Toronto in 1894. In 1901 Mr. Beatty entered the service of the C.P.R. as assistant to the General Counsel; in July, 1905, he became Assistant Solicitor, in 1910, he was General Solicitor. He has been in charge of the legal department of the C.P.R. since 1918. Mr. Beatty takes a great interest in Canadian education, and in addition to being one of the regents of McGill University, a Chancellor of Queen's University at Kingston. He takes a prominent part in many public movements, such as the Navy League.

Senator, the Hon. F. L. Belque, one of the leading lawyers of his province, was born in St. Mathias, Rouville County, Quebec, on May 20th, 1875. Acquiring his education at the College de Ste. Marie de Monnoir, he chose law for his profession, and later on became in L.L.D. of Laval University. He was called to the bar in 1893, and made a King's Counselor for the Province of Quebec in 1895, and for the Dominion of Canada in 1899. Accurate knowledge, sound judgment and clear speaking made him one of the leading lawyers of his period. His brothers in the legal profession have recognized this. From 1891 to 1892 he was Barrister of the Bar in the district of Montreal. Senator Belque has been engaged as counsel in many celebrated cases.

Sir Herbert Samuel Holt was born in D. Blin, Ireland, in 1853, a younger son of William Robert Gifford Holt, who was a member of one of the best-known families in King's County. He was educated at Trinity College, in his native city, and trained to the profession of a civil engineer. In early manhood he came to Canada, and engaged in railway construction.

It was not long before he became associated with James Ross in building some of the railway lines in Ontario that were subsequently incorporated into the Canadian Pacific system. A little later Mr. Holt found his way to Chicago and to the Canadian Pacific.

It was not long before he became associated with James Ross in building some of the railway lines in Ontario that were subsequently incorporated into the Canadian Pacific system. A little later Mr. Holt found his way to Chicago and to the Canadian Pacific.

J. S. Holt, James Ross, William Mackenzie and D. D. Mann, formed a company which built the mountain route of the Canadian Pacific Railway, and were awarded the contract for the construction of the Short Line of the C.P.R. from Montreal to St. John, N.B.

Sir Herbert Holt has for long been the president and guiding light of the Montreal Light, Heat and Power company, one of the most successful power institutions in America. He is one of the pioneers of electrical development in Canada, was president of the Royal Bank, and associated with numerous business enterprises.

Sir Augustus Nanton, a son of the late Augustus Nanton, Barrister of Toronto. He was born in Toronto on May 14, 1867. He was educated at the Toronto Model School. He entered the brokerage firm established by M. B. Oater in Toronto as a junior partner in 1884. In the same year he went to Winnipeg and established a

branch of the business there. In 1893 he became president of the Winnipeg Board of Trade. Later he was appointed president of the Winnipeg Stock Exchange. He holds the very important and influential position of Director and Chairman of the Canadian Committee of the Hudson's Bay Company. Other positions which he has filled are: President of the Manitoba Cartage Co., director of the Manitoba Cartage Corporation. Sir Augustus Nanton has been the promoter of many commercial enterprises, and few in Canada have a better knowledge of the West. He resides in Winnipeg where he is senior partner of the firm of Oater, Hammond and Nanton. He was knighted on June 4th, 1917. Sir Augustus is interested in boating and was for many years a member of Winnipeg Rowing Club.

A. D. MacTier, who is now Vice-President of the lines east of Port Arthur, like his former chief, David McNicoll, was born in Scotland. He came to Canada when a young man and entered the service of the C.P.R. as stenographer in the Baggage Department in 1887, becoming assistant to the Superintendent of Sleeping and Dining Cars in 1889. From 1891 to 1899 he was in the Car Service Stores and Fuel Departments, and from 1899 to 1899 was General Baggage Agent. From 1899 to 1907 he held the position of General Fuel Agent, when he was appointed assistant to the Vice-President. In December, 1912, he was appointed General Manager, Eastern Lines, and in 1918 he became vice-president of the lines east of Port Arthur.

D. C. Coleman, the C.P.R. Vice-President of lines west of Port Arthur, has had a remarkably rapid rise to such a responsible position, but has earned it, for he is known in railway circles as a man of exceptional ability. Born at Carleton Place, Ontario, in 1879, Mr. Coleman joined the C.P.R. as a clerk in the "Assistant Engineer's Office" at Port William in 1899. Rising rapidly he was appointed Superintendent at Nelson, B.C., in 1907, and in 1908 was Superintendent of Car Service, Western Lines. In April, 1912, he was appointed General Superintendent at Calgary and in 1915 Assistant General Manager, Western Lines, Winnipeg. In 1918, when Grant Hall left to become First Vice-President in Montreal, Mr. Coleman became Vice-President of the Western Lines.

Walter M. Crockett, L.L.B., Barrister, Solicitor, Notary. MONEY TO LOAN. Special attention given to collections. Chinook, Alta.

The Service Garage is selling plain casings 30 by 3 1-2 at 16.50 Non-Skids at 19.50 and Nobby Ireads at 20.00. Other sizes of tires and tubes at proportionate prices.

WANTED—To rent section of land 3 quarters under cultivation and at least 150 acres summer fallow. Must have full outfit farm machinery and horses. Apply Chinook Advance Office.

# Canada's Greatest Need Is An Increase Of Settled Population

Canada is an outstanding example of the effects of population and the Province of Manitoba, the smaller epitome of the effects of distributing the British people over the British Empire. The production, development and advance of the country have always proceeded parallel to the increase of settled population. When there were no people settled on this vast territory there were no cultivated areas, no manufacturers, no exports, no roads or other artificial means of communication and no accumulated wealth. Now in practically half a century all this has been reversed by the efforts of the migrating British and other races who have settled here.

Some people still imagine that the fewer the people the better off they are. They should compare the difference between Manitoba, or even Winnipeg, in the year 1894, when the Prince of Wales was born, and now. Then the immediate effects of increased population at once will be more apparent. Such persons have a right to object to the incursion either of races which have lower standards of living and will not easily fuse with the predominant race of the people, or they also may legitimately object to people being encouraged to come here on false assurances of unscrupulous persons that the earth will give her increase without much effort from the cultivator and that urban situations await all new arrivals.

The mere possession of the property qualification of \$250 on arrival is no antidote to the harm that such people may do to the welfare of those already here. At the same time equal evil is wrought on the employment of the community and the development of the province and of the Dominion by the exclusion of persons for whom there are permanent opportunities of employment which cannot be filled locally.

Scientific control of population places the right man in the right place at the right time. This is of benefit to the people at large as it distributes the debt between more tax payers, increases the earnings of the railways and makes more employment for others already settled in the province. The foundation of Canada, as we know it, now was immigration, or, as it is now called, imperial migration. The British people cannot migrate into an Empire of which they already form a part. When they emigrate to foreign countries they are lost to the Empire. When they migrate under the same flag, they become more effective and consequently of greater imperial value than before.

Natural increase is the subsequent additional method of augmenting the population. This, however, takes time as people have to be born at least 14 years before they become effective producers, and it is usually ten or more years later before they marry to so become the progenitors of subsequent generations. Migration is, however, immediate, and being selective, enables the right type of persons to be chosen for the work to be performed. Their advent at a working age also saves the country of destination the cost of their maintenance for the earlier years of their existence. Thus Manitoba receives the result of expenditure totalling over \$1,000 in every lad she gets from Britain.

**Big Gold Yield In Yukon.**  
The gold yield in the Yukon Valley, including Canadian and United States territory, for the season of 1921, aggregated approximately \$1,000,000, according to V. Richard, superintendent of northern commercial posts of Alaska. He obtained the data from commercial houses and other sources. Roughly this amount was divided as follows: Interior Alaska, \$2,675,000; Yukon Territory, \$1,250,000; Alaska, B.C., \$75,000.

Hydraulic operations around Dawson are ceasing for general clean-up purposes.

**Willie Wanted Information.**  
A school teacher in an American town resented to her class the story of the landing of the Pilgrims, and when she had finished she told each pupil to try to draw from his or her imagination a picture of Plymouth Rock. Most of them went to work at once, but one little fellow hesitated, then at length raised his hand. "Well, Willie, what is it?" asked the teacher. "Please, um, do you want us to draw a hen or a rooster?"

**Hero Worship.**  
"That young bride worships her husband, doesn't she?"  
"Well, she places burnt offerings before him three times a day."

W. N. U. 1287

## Was a Farmer, Not a Miner

Chinaman Would Not Dig Coal Found On His Land.

Sam Dean, in telling of his travels in China, gives the following story to illustrate the peculiarities of the Orientals.

The most unprogressive Chinese specimen I have seen was not a craftsman but a farmer—worth mentioning, I think, because of his indifference to money and his quality loyalty to the idea that one is born to a given way of life.

I met him on a terrace hill—his farm, as I soon discovered. A recent storm had partly denuded one of the terraces and disclosed an outcrop of coal. While I was examining the vein, the farmer came totting up from the valley with a basketful of earth on his back and poured it over the coal. "Why in the world don't you dig the coal and market it?" I asked. "You can get \$3 a ton for it in Peking and I warrant you don't make more than \$30 a year out of farming."

He stared at me. He obviously had not known that ever a "foreign devil" could be so ignorant, but he was willing to excuse me in whatever way he could. "I guess you haven't been in China very long," he said, "any fool can see that I'm a farmer and not a miner."

Perhaps he was right. Chinese coal diggers are born miners. I have never seen them tumble out of the holes where they have hurred all day in so grumpy a mood as that in which western colliers sometimes slouch away from the mines. To be sure, they are rough, and they swagger and yell and swear and think it fun to see the other fellow hurt, but they really love their work. It is hard work, too, for, though there are many mines—a few of them superintended by foreigners—there is, in most cases, no machinery. Boys bring the coal up on baskets on their backs or pull it on sledges by rope harness thrown across their shoulders, and yet, incredible as it may seem, they have not forgotten how to sing.

## Insurance For Ex-Soldiers

Has Advantage of Requiring No Medical Examination.

Business in the insurance division of the department of civil re-establishment is reported as being very brisk just now. An average of more than 200 applications for policies per week is being received and the number of returned soldiers holding policies now totals more than 5,000, involving some \$2,500,000.

By a recent change in the regulations, beneficiaries can now draw up to \$1,000 immediately after the death of the insured. The insurance division believes this is largely due to the increased interest in the scheme. There is also the fact that the opportunity for taking advantage of the scheme lasts only until Sept. 1 of next year.

The policies are for amounts of from \$500 to \$5,000. While the average policy was until recently for \$3,000, the demand is now principally for insurance for about \$2,000. Very few \$500 policies have been issued. The insurance scheme is open to any returned soldiers who served in the Canadian forces and has the unique feature of demanding no medical examination whatever.

## Took Millionaire For Beggar

Was Mistaken For Blind Man In Hard Luck.

C. C. Boswell, of Missoula, Montana, a copper millionaire, went to sleep in front of the Cadillac Hotel, Detroit. When he awoke he found 40 cents in his hat. The money had been contributed by sympathetic passersby, who mistook the millionaire for a beggar. Mr. Boswell came to Detroit to fill an engagement with Henry Ford. He sat in the chair in front of the hotel and dozed off, his black sombrero falling into his lap. The thick dark smudges he wears made it appear he was a blind man in hard luck, so the millionaires. Hence the forty-cent contribution. Boswell says it is the easiest money he ever earned in his life, but he is not going to repeat the experiment.

"House of Hearts" in California. A California woman has a home that is a veritable "House of Hearts." The table, chairs, etc., in fact, all the furniture of the peculiar house, is heart-shaped. The beds have heart-shaped headboards, supported on both sides by heartposts carved to represent Cupid's arrows.

## Revised Estimate Of Grain Yield

Total of Three Prairie Provinces Is 661,866,000 Bushels.

The revised estimate of the Dominion Government gives a wheat yield for Alberta of 60,716,000 bushels. Oats are estimated at 90,307,000 bushels, barley 10,732,000 and flax seed, 786,300. For Saskatchewan: Wheat, 173,589,000; oats, 183,863,000; barley, 12,500,000; rye, 3,957,000; flax, 5,420,000.

For Manitoba, the revised yields are: Wheat, 37,212,000; oats, 57,000,000; barley, 18,485,000; rye, 2,886,000; flax seed, 786,300. For Saskatchewan: Wheat, 173,589,000; oats, 183,863,000; barley, 12,500,000; rye, 3,957,000; flax, 5,420,000.

For Manitoba, the revised yields are: Wheat, 37,212,000; oats, 57,000,000; barley, 18,485,000; rye, 2,886,000; flax seed, 786,300. For Saskatchewan: Wheat, 173,589,000; oats, 183,863,000; barley, 12,500,000; rye, 3,957,000; flax, 5,420,000.

## A Leader Of Boys

To Be Successful One Must Preach What He Preaches.

To be a successful leader of boys a man must live the life that he wants them to live. A boy is a critical, suspicious creature, with high ideals and a sense of loyalty, but he has a perception of hypocrisy and insincerity that is uncanny. Most boys have a sense of humor; they like play-acting and jokes, and have a wonderful capacity for getting the sarcasm; yet their sense of justice is accurate, and they really like discipline, for it relieves them of responsibility. But it is useless to preach to a boy unless you are ready to back up your counsel by your example—YOUTH'S COMPANION.

## Recover Many Bodies Of Entombed Miners

King Sent Message of Sympathy to Victims' Relatives.

London.—Thirty-five bodies have now been recovered from the pits of the Mount Mulligan collieries in Queensland, following the recent explosions in those mines, according to a Reuter despatch from Brisbane. The despatch indicates that despite the fact that rescuing parties are equipped with respirators, it is now feared that they may have to abandon their efforts owing to the bad gases encountered in their work. Relatives of the victims have received messages of sympathy from King George, Viscount Curzon and Premier Hughes.

**Air Police System For Paris.**  
Aviation experts have been called in by the air ministry to study how an air police system may be installed, not only to protect the frontiers from smugglers, or enemy invaders, but also from bandits. The latter possibility has become serious because of aerial navigation between Paris and practically every European capital, with some of the voyages requiring night trips.

**Copper In Shetland.**  
London.—An important and rich discovery of copper has been made in Shetland. The lodes thus far proved give a high percentage and already half a million tons of copper ore is in sight.

Hungary announces an issue of currency to be printed on leather. Pigskin is the chosen material, which is said to be almost impossible to counterfeit.

## Argentine Lands High In Price

Must Go Far Afield to Get Cheap Farms.

Many applications for settlement on land in the Argentine have been received from the United States and Canada. The recent government decree opens up 10,000,000 acres of government land for the establishment of colonies in different parts of the republic.

These government lands are to be sold to colonists, but it is understood that the price will not be low. They are located as far north as Missiones near the Brazilian border, where the climate is tropical, and as far south as Terra del Fuego, which corresponds to the latitude of Labrador. Some of the land already is partly colonized and it is understood that the titles of the present settlers will be adjusted.

The government colonization plan generally is approved by the newspapers because of excessively high land values prevailing. Land is comparatively speaking in the hands of a few individuals who hold the price too high to make it attractive to immigrants or who will not sell at all.

A small farm two hours distant from Buenos Aires is just as expensive to buy, it is asserted, as a small farm the same distance from a large city in England, France or Germany.

One of the papers, the Times, points out that in order to obtain cheap land the immigrant must go far afield and he often finds that what he saves on the price of the land has been swallowed up by the extra expense of getting himself and his family settled on it and securing his equipment.

Argentine wants immigrants because, for one reason, her agricultural development has been arrested for more than a decade. Carlos Tornquist, a leading Argentine banker and economist, says that in the last 12 years Argentine livestock has improved in quality but has decreased in quantity.

## Luckiest Of Explorers

Shackleton Has Best Equipped Vessel To Enter Polar Seas.

Sir Ernest Shackleton, interviewed before the departure of his expedition for the Antarctic, via Cape Town, said: "The ship Quest is the lightest vessel that ever ventured into polar seas and by far the best equipped. In this respect, therefore, we are the luckiest of explorers, and should be able to wrest from the Antarctic many of its grimly held secrets."

Captain Saunders' utility boat, Coucous, has been dispatched from Cowes to join the Quest at Plymouth. This utility boat can be sailed, rowed, punted, paddled or propelled by gasoline engine. It is fitted with a rubber band enabling its use among sludge ice.

**Newton Invented Thermometer Scale.**  
The thermometer scale was really invented by Sir Isaac Newton. Fahrenheit, finding that a more intense cold could be created by mixing ice and snow, took that as his zero, and for convenience divided Sir Isaac's scale by four.

In Japan books are bound with the edges in; the readers begin at the back and go forward, and they read vertically instead of horizontally.

# Arctic Circle Region Is Hedged About With False Impressions

In the lamentable ignorance which exists in many other countries regarding Canada, her wealth and resources, and particularly on her climate, hosts of strangers who know not the great land might be inclined to include under the appellation the greater part, if not the whole, of the Dominion, undreading the fact that there must be a summer of blazing glory behind its consistent winter successes in wheat growing; and a bracing spring and fall to commence and terminate a lengthy agricultural season. There are countless too, misconceptions on the mighty Yukon territory where for many years a civilization has existed, modern in its very phase, and progressing along the same lines as areas further south.

But there is an Arctic north to Canada, by which is indicated that territory adjacent to, and inside of, the Arctic circle, a region where only superficial exploration has been carried on and for this reason is hedged about with a thousand misconceptions and false impressions. It is indeed a region of cold winters, but also one of exceedingly bright warm summers. It is not the barren waste popular opinion has pictured it but one of luxuriant verdure and extensive vegetation. It has a wealth of natural resources and other potentialities, a decided future asset to the Dominion.

International interest being particularly centred on this northern territory of Canada, it is now appropriate to look into its features.

It may sound absurd to speak of agriculture here, but one might suggest that wheat would never be grown in the Canadian North-West. The amazing fact might also be pointed out that as far back as 1872 wheat grown by Rodrick Mackenzie, brother of the great explorer, at Port Chipewyan, which is to all intents and purposes within the Arctic circle, carried off the first prize at the Centennial Exposition at Philadelphia. This was in an era prior to the plains of the south coming into prominence as cereal producers and bearing off most of the prizes for the North American continent.

Though far, at the present time, constitutes practically the sole commercial product of this region, there is every reason to suppose that at some future time, when the millions of acres to the south of it, as yet unproductive, have been brought under the plough, this section will make a name for itself in agriculture. There is no reason why it should not.

What for lack of 1872 wheat grown by Rodrick Mackenzie, brother of the great explorer, at Port Chipewyan, which is to all intents and purposes within the Arctic circle, carried off the first prize at the Centennial Exposition at Philadelphia. This was in an era prior to the plains of the south coming into prominence as cereal producers and bearing off most of the prizes for the North American continent.

It requires but little imagination in the face of recent undertakings to

foretell the future of the great tundras of the Canadian Arctic north as the greatest meat producing region of the world which will make the palatable and nutritious meats of the caribou, reindeer and musk-oxen familiar to the dining tables of the globe. Three islands in the waters of the North-West Territories: Southampton, Mangel and Gots, each with an abundance of fodder, have been set aside by the government as perpetual breeding grounds for reindeer and musk-oxen. Steffanson, the famous Canadian explorer, has formed a company with British capital and secured a thirty-year grazing lease on the south half of Baffin's land for the same purpose. The North American Reindeer Company has a ranch of 73,750 square miles north of the Churchill River to graze reindeer and caribou upon for commercial purposes, whilst another large concession of the Northwest has been secured by the Hudson's Bay Reindeer Company, a commercial organization with the same aims.

The bleak Canadian north framed in perpetual ice and snow, the monotonous barren tundras of the Arctic circle are fictitious features of long harbored traditions having no substance in fact. This region is one of latent wealth and potentiality, largely unproductive as yet on account of lack of exploitation, but fast being penetrated and forced to utilize. Canada has large areas to the south yet awaiting settlement and development and when these are producing to their full capacity, the rich Canadian Arctic regions will come into their own.

## Everything Orderly In North Country

Residents Have the Greatest Respect For British Justice.

Major G. L. Jennings, superintendent of the Royal Canadian Mounted Police, who has returned to Edmonton following a tour into the north that occupied a period of three months, and took him over distances aggregating four thousand miles, has come back with the information that everything is orderly in the north country and that the residents of the great stretches of territory lying between Edmonton and the Arctic have the greatest respect for British justice and the orderly traditions of the British race.

The trip made by the police superintendent took him to all detachments of the force as far north as Herschel Island. All posts were visited and all were found to be characterized by the traditional efficiency of the Canadian Mounted Police force. Superintendent Jennings announces that the coming winter will see several dog patrols throughout the north which will pay visits to the various oil camps and other centres. One of these patrols will go through to Fort Good Hope and another to Dease Bay and onward to Great Bear Lake. Apart from the oil activity, Major Jennings returns with the information that there is very little change in the north country from the conditions which prevailed during his visit about twelve years ago. Like many other travellers to the north, he brings back news that the condition of the Smith Portage is very bad and badly in need of improvement.

He reports law and order in the north to be on a high plane and that general conditions could not be more satisfactory. Not in one instance, he says, has it been necessary to prosecute any person who has entered the north under the clearance certificate.

## Belgian Entrant Won Balloon Race

All of the Fourteen Competitors Accounted For.

London.—With the landing of the Swiss balloon, piloted by Paul Ambruster, all the 14 competitors in the International race for the James Gordon Bennett trophy, which started at Brussels, Belgium, have been accounted for.

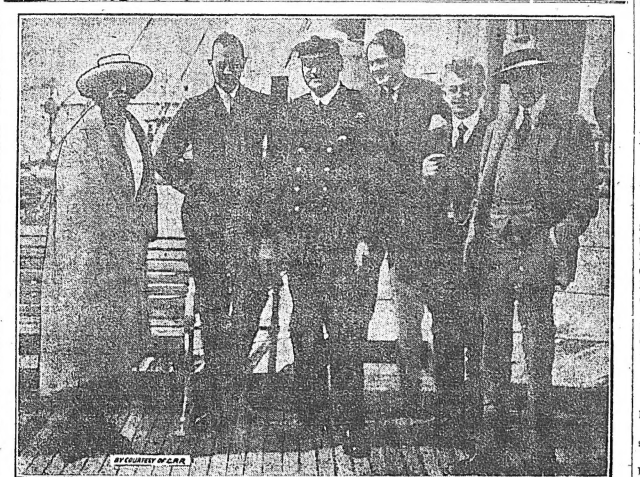

The Swiss entrant landed at Lough Island, off the east coast of County Dublin, Ireland, and therefore wins the cup.

**Sarcasm.**  
Dad (sternly)—Where were you last night?

Son.—Oh, just riding around with some of the boys.

"Well, tell 'em not to leave their hairpins in the car."—Texas Scalper.

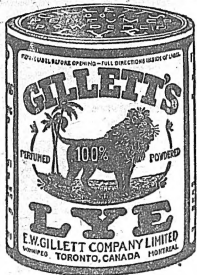

**A Look That Lingers.**  
Most of us keep at least one eye on the temptation we pray to be not led into. —Grenville (S.C.) Piedmont.

NEW GOVERNOR-GENERAL'S ARRIVAL IN CANADA.  
Reading from left to right—taken on board S.S. "Empress of France." Lady Byng. His Excellency Lord Byng, G.C.M.G., Commander E. Cook, R.N.R., Captain The Honourable W. D. H. Joffe, A.D.C., Mr. Neil McLean, Labor M.P. for Glasgow, The Honourable Captain F. W. Briskine, A.D.C.

## World Happenings Briefly Told

Canton has to go without its morning, noon and evening tees. The tea-house waiters are on strike.

The Lord Provost of Glasgow has reopened the fund for the purpose of paying rents of the deserving unemployed.

The Shanghai Day and Night Bank has been organized on the plan of remaining open for business until midnight.

An Avro airplane in good condition was sold in Ulenburg, S.A., on a court order, for \$145, the highest bid offered by a Port Elizabeth firm.

America has seven special "chapel railway coaches," each provides a home for the minister and his family, and has seating accommodations for 50 persons.

A large twin flight airplane shed, which is said to have cost more than \$150,000, has been sold at auction in London for \$525.

Rumors that King Christian of Denmark is shortly to pay an official visit to the United States are unfounded.

Teaching in England and Wales has become more popular since the end of the war. The Board of Education reports 600 more teachers enrolled this year than last.

Thomas Sullivan, arrested for breaking into the store of the British and Foreign Bible Society, Cape Town, and stealing a Bible, was sentenced to three months imprisonment.

Lady Patricia Ramsay, formerly Princess Patricia, has just received through Col. Hamilton Gault, a bronze statuette representing a man of Princess Patricia's Light Infantry in full fighting kit.

The staff committee of the League of Nations has adopted the proposal of Sir George Perley that the staff should be recruited, with fair proportion, from all the countries that are members of the league.

The Workers Dreadnought, Sylvia Pankhurst's paper, is not going to stop publication as previously announced. Miss Pankhurst has stated that she will continue the paper as she has been successful in raising the £500 necessary to carry on with.

Router's correspondent in Bombay say that the news of the arrest of prominent agitators in Bombay and Simla was received quietly throughout India. There were a few slight disturbances in Bombay, but these were confined to the smashing of train windows.

## The Man Who Said: "The proof of the pudding is in the eating"— was only half through

He started a good pudding-proof, but he didn't finish it.

There's a lot of trouble in the world from puddings that taste good but don't do good.

They "eat" well, but that ends the recommendation.

Sanitariums are full of pudding-eaters who stop at the taste and forget to inquire whether their food gave the body what it needed—until the body rebelled.

Grape-Nuts is a food that tastes good and does good. The proof of Grape-Nuts begins in the eating and goes on through the splendid service which Grape-Nuts renders as a real food. Grape-Nuts is the perfected goodness of wheat and malted barley—delicious to taste, easy to digest, and exceptionally rich in nourishment for body and brain.

"There's a Reason" for Grape-Nuts

## World's Finest Diamond

Was Given to King Edward by Transvaal Government.

The largest diamond in the world is the Cullinan diamond, given to King Edward by the Transvaal Government in 1907. The stone was presented to King Edward in token of the loyalty and appreciation of the people of the Transvaal for the bestowal of the constitution on the colony. It was unearthed at the Jaagerfontein mine, Orange River Colony, South Africa, in 1905. In its rough state it weighed 3,025 carats, or 1 1/4 pounds. Amsterdam diamond cutters made nine large stones and several smaller ones from it. The largest still weighs 516 1/2 carats and is said to be the most valuable and brilliant diamond in human possession today.

## RHEUMATISM! Is Yours Acute or Chronic?

In either case you'll get such results from good old "Nerviline" which has five times the pain destroying power of ordinary remedies. Nerviline gives results because it penetrates to the source of the pain, because it contains ingredients that destroy rheumatic pains. It is the only remedy that cures the source of the pain, and is usually but cases that prove the power of Nerviline. Suited for young and old; used internally and externally for many purposes, 25c at all dealers.

## Choosing Future Queen

Prince of Wales Will Not Be Forced Into Matrimony.

The public never tires of providing the Prince of Wales with wives; it is a favorite amusement not only with women but with men. I was told in confidence who the embryo Princess really is the other day. I shall not betray the confidence, but may say it is a girl whose engagement to a quite another young man will soon be announced. Yet I was assured the information came from a member of His Royal Highness's household direct to my informant. So much for social tips, which are about as reliable as racing tips. The Prince is not going to be either hurried or coerced into matrimony. When the announcement of his engagement is made it will be sudden and surprising—we may be sure of that—and I will not please everybody!—Belmont Weekly News.

One of the best known guides in Nova Scotia gives this testimonial of MINARD'S LINIMENT: "I have used Minard's Liniment in my home, hunting and lumber camps for years, and consider it the best white liniment on the market. I find that it gives quick relief to minor ailments, such as sprains, bruises and all kinds of wounds. It is a great remedy for coughs, colds etc., which one is liable to catch when log driving and cruising during the winter and spring months. I would not be without MINARD'S LINIMENT and cannot recommend it too highly." (Signed) Ellison Gray.

A Chicago woman destroyed her husband's clothes in a fit of passion. He complained of her; she was arrested and fined, and he had to pay the fine.

The half-moon fish, which is found in the upper waters of the Amazon, casts a phosphorescent glow resembling moonlight.

## New "Court Of Miracles"

House Described by Victor Hugo Discovered in Paris.

A new "Court of Miracles," so vividly described by Victor Hugo in "Notre Dame," has been discovered in Paris.

Every night scores of beggar-blind men, lame men, deaf men, dumb men, paralyzed men—came to the house of the "King of Egypt," himself a "blind man" by profession, behind the town hall and in true beggars' style spent their "earnings" in revelry all night long.

Neighbors complained, and one night recently the police descended on the "Court of Miracles" with an ejectment order, but the beggars set up house again in the open air on a piece of waste ground and the revelry began afresh.

The joyous spectacle increased in intensity. The blind saw and the deaf heard, armless men took out musical instruments and played while crippled, palsied people merrily fox-trotted in the ruddy glare of the camp fire.

The police interrupted the fete, but just as in the days of yore they were met by a stubborn resistance and attacked with crutches and imitation lugs and arms. They were routed.

Next morning they returned to the musical instruments and played while crippled, palsied people merrily fox-trotted in the ruddy glare of the camp fire.

## A MOTHER'S ADVICE

Once a mother has used Dab's Own Tablets for her little ones she is always happy to recommend them to others. Her advice, given after a careful trial, can be readily followed with assured good results. The Tablets are a mild but thorough laxative which never fail to regulate the bowels and sweeten the stomach. They always do good—they cannot possibly do harm even to the youngest babe. Concerning them Mrs. P. Laforest, St. Nazaire, Que., writes: "For three months my baby was constipated and cried continually. On the advice of a friend I gave him Dab's Own Tablets and now at the age of five months he is perfectly well and weighs twenty pounds. I am delighted to be able to advise other mothers to use them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

First Baby Travels to Paris. Among the passengers on the Croydon-Paris aeroplane was a baby girl just 5 1/2 months old, who was going to France with her parents. This is the first baby known to travel by the Continental airway. Frieda Inglin, as she is called, lay quite contentedly in her mother's arms, and did not appear to be in the least frightened by the roar of the giant engines.

Isn't She Mean? She (during the quarrel)—You never deserved a wife like me! He—And I never deserved the rheumatism, but I got it just the same.

Complete In Itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

## A Growing Union

Movement in Progress to Extend Union of South Africa.

The Union of South Africa, over which General Smuts presides, contains four provinces, but is only a third larger than British Columbia, or two-thirds the area of Quebec. The movement now in progress for the annexation of the colony of Rhodesia, at present administered by the British South Africa Company, would nearly double the area of the Union by adding 450,000 square miles to the 470,000 now administered by the Union Government. It would add 1,500,000 to the native population, with some 40,000 Europeans.

The Government of Mr. Smuts is also administering the former German protectorate of West Africa, an estate of 220,000 square miles, with a small European population and several hundred thousand natives. The number of the natives was greatly reduced, and some races nearly exterminated during the German occupation. General Smuts is thus likely to have under his jurisdiction 1,200,000 square miles of territory, with a total population not much less than that of Canada.—The Daily Province.

Outlasted. Mother—These little playmates of yours look rather common, Bobbie. I hope none of them swear.

Bobbie—Oh, some of 'em try to, mother, but they ain't much good at it.—Life.

GINZIF, a merchant of Kiachta, has the reputation of being the greatest bear hunter in Siberia. He is 65 years old and recently killed his seventy-seventh bear.

## For Hair And Skin Health Cuticura Is Supreme

The majority of skin and scalp troubles might be prevented by using Cuticura Soap exclusively for all toilet purposes. On the slightest sign of redness, roughness, pimples or eruptions, apply a little Cuticura. Cuticura Talcum soothes and cools the skin and cures itching and perspiration. Delicate, delightful, distinguishes. See it, demand it, take it. Sold throughout the Dominion. Canadian Agents: Seaton, Limited, 24 S. Park W., Montreal. Cuticura Soap shaves without razor.

## German Merchant Sold Poisoned Hat

Leather Band Contained Quantity of Sulphuric Acid.

The last form of German "frivolousness" is in the form of a poisoned hat, which produces severe pains in the head. It must be recorded, however, in fairness to Fritz, that the inconvenience suffered by the wearers of such headgear is the result of chemical action, and forms no part of a deliberate scheme to inflict torture on the public.

A hatter at Bonn has just been sued for selling a customer a poisoned hat. After wearing the hat a short time the man felt his forehead throbbing and shooting pains in the head. Not being accustomed to such malaises, he had his hat examined and found that the band was made of artificial leather, which contained a sufficient quantity of sulphuric acid to account for his pains.

The Court awarded the buyer damages and told the hatter that it was his business to discover whether his goods were injurious to customers before selling them.

Attacked by Asthma. The first fearful sensation is of suffocation which hour by hour becomes more desperate and hopeless. To such a case, the relief afforded by Dr. J. D. Kellogg's Asthma remedy is very grateful. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

## Error In Report.

A discrepancy of 100,000,000 bushels in the crop yield estimate of the Dominion Bureau of Statistics is revealed by officials of the Saskatchewan Co-operative Elevator Company. Quoting the estimated wheat yield for the Dominion this year as 20,000,000 bushels, the Dominion Bureau's report says that the total may be greater than the aggregate in 1915, which, by the Bureau's own figures was 29,000,000 bushels.

## Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH CURE is a tonic, taken internally, and acts through the blood upon the mucous membrane of the system. HALL'S CATARRH CURE assists Nature in restoring normal conditions. All Druggists. Circular free. F. J. Cheney & Co., Toledo, Ohio.

## Canadian Wool

Has Good Reputation

High Quality Appreciated by States and Overseas Markets.

A virtual revolution has been wrought in the wool industry of Canada in the past few years. Whereas but a short while ago the wool produced in Canada was offered for sale in such an unsatisfactory state that the Canadian manufacturer looked with indifference upon the home-grown product, today he realizes that Canadian wool compares favorably with that of any other country and more than half of the domestic production finds its way to Canadian mills. Not only is the high quality of the Canadian product appreciated locally but in the United States and the overseas markets it is now generally recognized that Canadian sheepmen are producing wool the equal of similar classes and grades grown elsewhere in the world. Gradually but surely a reputation has been built up for Canadian fleece wools on the domestic and foreign markets.

The patriotic man is loyal to his country and to the community in which he lives. If he is consistent he will give first preference to Canadian made goods when making purchases. He will also stand loyally by his local dealer.

Minard's Liniment used by Physicians

W. N. U. 1387

## Gingham and Cretonne United

By Marie Belmont.

This youthful frock shows the effective use of cretonne as a trimming. It is fashioned on very simple lines that affect the much-liked chemise dress. The frock is made of orchid-colored gingham, although should you wish you might copy it in any other color that may be more becoming to yourself. It is fastened down the back with self-covered buttons. The deep border and flat collar are cut from cretonne which has a lavender and green grape design. The three-quarter sleeve is finished with a flaring cuff of the cretonne. A girle of bright green ribbon encircles the waistline.

## Made Long Journey Without Food

Penguins Are Able to Fast For Many Weeks.

Fourteen blackfooted penguins have just journeyed 6,000 miles to the London Zoological Gardens without a bite to eat. Even now they are not in a hurry to restart the meal habit, says the Daily Mail.

There is an extraordinary variation between the fasting capacity of birds. Some starve if they have to go through an 18 hours night, while the penguin's limit has not been ascertained, though they go for many weeks without signs of distress beyond a certain slowness. Seals also share his power of going without food. A few weeks between meals does not seem to worry them, though they make perfect pigs of themselves when they like. Remember Augustus, the sealion, who got at the Zoo main supply of fish and devoured the whole consignment. Then, four hours later, when the authorities had scraped together a few hundredweight for the remainder of the fish-eaters, Augustus took his place in the "bread-line" without a blinch.

## He'd Die First.

Mr. Giggins—Poor Bill was sentenced for life. Mrs. Giggins—Sentenced for life? A delegate fellow like him? Well that's a joke on the judge, 'cause he's too sick to ever serve a life sentence.

## Wretchedness OF Constipation

Can Be Quickly Overcome by CARTER'S LITTLE LIVER PILLS. Purely vegetable—act sure and gently on the liver. Relieve biliousness, headache, indigestion. They do their duty. Small Pill—Small Dose—Small Price.

## Italian Trade Suffers

The balance of trade is still running against Italy. In the five months of 1921, the imports were approximately \$217,000,000, while the exports amounted to but \$134,000,000. This leaves an adverse trade balance of \$183,000,000. In the corresponding period last year the adverse balance was \$160,000,000.

The nests of South American hornets are used by the natives as baskets, being light, strong and so closely made as to be waterproof.

You can't expect the dove to settle down while the raptors keep up such a din on north battlements.

## MONEY ORDERS

A Dominion Express Money Order for five dollars costs three cents.

LADIES wanted to do plain and light sewing at home; whole or spare time; good pay, work sent any distance, charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

## NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

**BOOK ON DOGS**  
DISEASES AND How to Feed and Train them. Address by the  
H. CLAY GLOVER  
America's Pioneer Dog Remedies  
118 West 114th Street,  
New York, U.S.A.

**COOK'S Cotton Root Compound**  
A safe, reliable, regulating medicine. Sold in 25c and 50c bottles. Sold by all druggists or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Solely Watson).

## ASPIRIN

"Bayer" is only Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin at all. In every Bayer package are directions for Colds, Headache, Rheumatism, Eczema, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost very little. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monocellulose and Salicylic Acid.

## CLARK'S

## Pork and Beans

A Supply of "Clark's" Good Things, all ready to serve provides a choice of many excellent dishes for every occasion, without hours of cooking. For a satisfying, strengthening meal, serve

## Clark's Pork & Beans

WITH CHILI, TOMATO OR PLAIN SAUCE. A real treat. Every bean cooked just right in the great Clark ovens. Never hard, never mushy, and the seasoning is delicious.

### 175 Battalion Will Hold Annual Re-Union

The third annual re-union of the 175th Battalion will be held in Medicine Hat on Saturday, October 8. The annual meeting, followed by a smoking concert, will take place in the G.W.V.A. hall at 8 p.m.

On Sunday, Oct. 9, the Battalion colors will be deposited in St. Johns Presbyterian church.

Any old member of this battalion who desires to attend the re-union is asked to advise the committee in charge and in any case pass the word along to any of the old boys whom you may meet.

A large number of young Saskatchewan wild ducks have been caught and banded for the purpose of ascertaining their migration route and winter home. All shooters are requested to carefully examine all birds killed for small aluminium band either on right leg or right wing near the body, reporting the number of band and variety of bird to address found thereon.

### School Oranize Literary Society

Last Friday afternoon the pupils of rooms three and four of the Chinook Consolidated School held a meeting and organized a Literary Society. The following officers were elected:

President, Kietha Brown; Vice Pres., Helen Lensegraf; Sec'y., Dorothy Stata. High School executive: Mamie Reynolds Ray Deman and Bobbie Hamon. Public School executive: Ernest Noble, Harry Stata and Jessie Radford.

### Sunflower Crop Yields 17 Tons to the Acre

The sunflower crop on the farm of E. C. Thomas and Son, of Lloydminster, this year averaged over 17 tons to the acre. Some of the stalks were more than ten feet high. The fodder was chopped, mixed with straw, and stored in a silo.

The cost of this forage crop, after paying all expense for plowing, sowing, cultivating, seed, rent, and all harvesting operations, and allowing ten percent for depreciation of equipment, silo, binder, ensilage cutter, was within a few cents of \$2.00 a ton.

### Seeding of Fall Rye

According to an article in the Family Herald, it is estimated that Southern Alberta and Western Saskatchewan are seeding about eight hundred and fifty thousand acres to fall rye, as compared with three hundred and fifty thousand acres last year, an increase of about five hundred thousand acres.

### Threshing Accident Near Oyen

Mr. E. I. Budd, of Oyen, lost all his fingers and part of the palm of his right hand on a threshing machine last Saturday.

At the recent meeting of the Chinook Sunday School for re-organization purposes the following appointments were made: Superintendent, Mr. J. W. Yake; Vice-Superintendent, Mr. Belden; Sec'y., Miss D. Stata; Organist, Miss D. Roberts. Teachers: Tuxis Boys, Mr. Belden; Traff Rangers, Robt Smith; Grade 4, Miss Reist; Grade 3, Miss Ethridge; Grade 2B, Mrs. McKenzie; Grade 2A., Miss Lund; Primary, Mrs. Kettlys.

### Big Fire at Hatton

Twenty five business places and ten houses were destroyed by fire at Hatton, Sask., early last Sunday morning. The damage is estimated at between \$400,000 and \$500,000. This is the third big fire in Hatton in eighteen months.

### The Wearing of a Red Poppy

The memory of those who made the supreme sacrifice in the Great War will be revered in Canada this year, by the wearing of a red poppy on Armistice Day.

Alberta will have 12 seats in the next house of commons, British Columbia 13, Saskatchewan 16, Manitoba 15, and the Yukon, a total of 57 seats west of the Great Lakes. Ontario will have the largest representation, 82. Quebec is next with 65, Nova Scotia 16, New Brunswick 11 and P.E.I. 4. The total number of seats in the federal parliament will be 235.

### Re Skating Rink

Editor, Advance, Chinook.  
Dear Sir:

I was glad to see, in your last issue of the Advance, your editorial re "Winter Amusements for the Young People".

If we are to have a skating rink this winter it will very soon time to start doing something in that direction. To get a rink here, well lighted and large enough for inter-town hockey matches, will mean the application of a considerable amount of energy and expense; but when one reflects how badly it will be needed and how greatly it will be appreciated, not only by the young people in our town, but by the older ones as well. Is it not up to everybody to be willing to make a few sacrifices to bring this about.

I have heard it mentioned that the fire site on Main street might be a desirable location. My own opinion is, that it has more to recommend it than any other place in town. Perhaps the old Hawkshaw building could be secured as a dressing room, and as for lighting that difficulty is already partly overcome by the lights on Main street, which shine directly on the spot. No doubt a considerable amount of grading will have to be done, but other advantages the site offers will partly make up for this difficulty. Then there is the fence problem. Perhaps the V.I.L. age Council would be willing to help out in this. I believe in the past year when the town had a rink the local lumber yards loaned the lumber on a percentage basis of depreciation.

Now suppose that those who are interested, will help all they can and we can get a piece of ground levelled, fenced and flooded; then perhaps someone owning a team of horses might be hired to haul the water during the season.

In closing: There is one thing quite clear viz; that if enough of us sufficiently interested and will do all we can in helping we will have a rink, but if we are not interested and are not willing to assist we will not get our rink.

I suppose it will be necessary to call a meeting to decide on a location and to appoint a committee.

M. E. BIRD
